

## FOSTER PARENTS SOCIETY OF ONTARIO

Charitable Status # 0873919-09

December 1, 2003

Great News for Foster Parents!

The Foster Parent's Society of Ontario is continually seeking benefits that you as a Foster Parent, might be able to take advantage of, as part of your affinity to the organization you cared so much to join. We try to seek benefits that you might normally use in your everyday life.

We are most pleased to announce that Maritime Life has been selected to provide outstanding health protection to you and your family.

Quite frankly, upon doing our homework on health plans, we were surprised that 40% of Ontarians have no health coverage. This statistic was enough to make our decision easier to investigate offering our membership a specially designed plan for individuals who do not have any form of group health coverage.

The plan covers things like dental, vision, prescription drugs, physiotherapy, and many other medical expenses not fully covered by your provincial health plan.

You have choices of various levels of coverage to suit various family needs, and all of the plans offer good health coverage at competitive rates.

As a Foster Parent, the plan will provide coverage not only for you but also for your natural and adopted children. As long as you keep the plan, coverage will be effective, whether you maintain your status as a Foster Parent or not. Those children covered under a plan will have the option of continuing the same coverage as an adult, without medical underwriting.

Maritime Life is one of Canada's leading health and life insurance companies, and you will have peace of mind knowing you will receive personalized coverage for you and your family at prices affordable in today's market place.

If you are like many others without a health plan, except for your provincial health coverage provided by the province, we encourage you to examine the Foster Parent's Health and Dental Plan as provided in our website. [LINK](#)
